- Queen
- King
- CAL King
- Full
- Twin XL
- Twin

Copper Infused

Very tiny copper particles infused throughout the layer of memory foam work together to transfer excess heat away from your body while you sleep.

We suggest copper mattress to everyone to deal with any sleep problems. It is important to have a proper body posture while sleeping to ensure a healthy lifestyle. **There are many advantages of using copper as your mattress and pillow material. Some of them are:**

1. **Copper gives a cooling Effect-**

Copper is one of the most powerful conducting metal. It is largely used in industrial and technological applications to tolerate the highest of temperatures.

2. **Copper gives firmness and support-**

While you lie down, the copper pillow and mattress will give you the desired support to your back while sleeping. It gives you a soft and plush feel.

3. **Clean material-**

Copper has antimicrobial properties. This makes the material perfect for kids and infants. Kids usually have the habit of drooling while sleep, thus the material will take care of it.
