Service Learning:

In AY 2011-2012, I directed a year-long service-learning experience for students in the one-year master degree program in bioethics at KCUMB. They spent the fall volunteering and learning about a particular agency and the population they serve, and in the spring, they developed a program or project that responds to a need they have identified in collaboration with those stakeholders. This was rated as incredibly valuable by the students, the volunteer organizations, and the university administration, but was suspended due to department-wide enrollment issues.
