The accumulated research from Yang I. Pachankis, a 1987-born, shares a cosmological paradigm originated from the Big Bang theory. The main fields and disciplines of his research range from: 1) consciousness studies and philosophy; 2) cosmology, astronomy, astrophysics, and cosmochemistry; 3) nuclear medicine, psychology, psychiatry, and immunology; 4) criminology, international relations, legal studies, and military studies; 5) macroeconomy and strategic studies; to 6) public health. The trans- and cross-disciplinary research coverages are value-orientated with the Universal Declaration of Human Rights. Research publications and conference attendances are presented thusly.
