### Student Evaluations:

#### Logic for the Liberal Arts (Introductory; UMM 2021)

- “The way of teaching that she [Dr. Mickelson] did during the semester was a great way to learn.”
- “She [Dr. Mickelson] was strict with her rules and they were fair.”
- “[Dr. Mickelson] was very passionate about what she was teaching and showed how the lessons she gave are able to be applied in real life. Although some outlooks were kind of pessimistic, the way she taught us overall was engaging and fun.”

#### Symbolic Logic (Introductory; UMM 2021)

- “Kristin is very flexible and is willing to change her course on the fly to accommodate students. If the majority of the class didn’t understand something, Kristin is always willing to put aside plans for the day to help.”
- “She [Dr. Mickelson] did a good job of shifting things around, for example if we didn't understand something she might scrap her lesson plan for the day and did [sic.] something else so we could spend more time on the thing we were struggling on.”
- “Dr. Mickelson had us complete short, daily quizzes which allowed us to practice the content we learned over and over again. This repetition ended up being super helpful in learning symbolic logic. She compared this strategy to practicing a new language and logic really is like that.”

#### Philosophy And Religion (Introductory; CU-Boulder, 2015)

- “One of the best professors I’ve had at CU yet.”
- “Professor Mickelson is one of the best instructors I’ve had and has given me a huge interest in this topic.”
- “Professor [Mickelson] highly challenged me in this course and provided me with the ability to expand on my way of thinking. I was not prepared for the overall challenge of this course, but nonetheless learned a lot and recommend it to A-students.”

#### How to Think About Weird Things (Introductory; UMM, 2013)

- “I loved this class!”
- “She [Dr. Mickelson] was genuinely interested in having us understand the material and enjoyed teaching.”
- “She [Dr. Mickelson] talked with me outside of class and helped show me different perspectives and ways to think about an idea.”
