UNIVERSITY EDUCATION

UNIVERSITY OF FRIBOURG

2015 – 2021 PhD in Philosophy, *Summa Cum Laude*
Title: Weltverhältnis und Weltverlust. Versuch über Skepsis und Metaphysik der Modalität [Relation to the World and Its Loss. Essay on Scepticism and Metaphysics of Modality]
Committee: Prof.s G. Soldati; R. Bader; T. Rosefeldt; G. Hindrichs
Abstract: I investigate whether our cognitive relation to the external world is fundamentally problematic, as the Cartesian sceptic would have it. In the first three chapters I argue that the divine deceiver argument is the only argument for external world scepticism in Meditation I, and that it depends on metaphysical possibilities being independent of actuality. Chapter four mobilises Descartes' theory of eternal truths to undermine the latter view, and external world scepticism with it. Chapters five to seven investigate whether the ontological argument supports the foundation of Descartes' metaphysics of modality: the existence of an omnipotent being. Drawing on Descartes, Baumgarten, and Kant, I argue that it does not because the view of existence needed for the argument to be successful unacceptably entails that existence judgments are about concepts, rather than objects.
