

I received my Bachelor's degree in Philosophy from the University of Bremen and my Ph.D. in Philosophy from the University of Bonn in 2017. My doctoral dissertation is entitled ***Die menschliche Person und Hermeneutik: Eine integrative Theorie.***

Since 2017, I have been conducting research in South Korea, primarily in the philosophy of technology and the philosophy of artificial intelligence. Recently, I have proposed an alternative position called **emotional relationalism** concerning the moral status of artificial intelligence, and I am currently developing a broader philosophical project that advances an **expansive anthropocentrism** in opposition to new materialism.

I am affiliated with the College of Liberal Arts at Woosong University and the Institute of Philosophy at Korea University.
