PROFESSIONAL SUMMARY

Multi-talented independent researcher and visionary author with over 20 years of experience in law, literature, hard science fiction, and social impact initiatives. Originator of the CMM1 Hypothesis (Cosmic Dark Matter + Microbes + Matter = One) — a unifying interdisciplinary framework connecting microbiology, astrobiology, cosmology, philosophy, and planetary stewardship.

Author of the internationally acclaimed book *The Architects of the Universe*, which explores microbes as primary architects of planetary habitability and climate stability. Actively uses research, literature, cinema, and music as tools for climate awareness, environmental protection, and social reform.
