Academic and Policy Impact Summary

Independent interdisciplinary researcher specialising in institutional sociology, neurodiversity, and AI governance. Author of forty three research outputs on Zenodo, with multiple book length manuscripts and policy submissions to European and UK public bodies. Founder of the Equilibrium Ledger framework, bridging lived experience, psychometrics, and organisational theory.

Original Theoretical Frameworks and Policy Submissions

Regulatory intelligence and policy strategy, EU and UK

- European Union white paper, 2026: The Entropic Ledger, a socio anthropological audit of the European neuro crisis, analysing the energetic cost of administrative abstraction.
- European Union policy submission, 2026: The Cellophane State, From Density to Abstraction, tracing institutional thinning in European governance and its impact on cognitive health.
- Equality and Human Rights Commission, 2026, case reference 14960720: Structural reform of doctoral admissions. Regulatory roadmap proposing Vertical Time assessment standards and Universal Temporal Design to dismantle discriminatory admissions architectures.

Proprietary research frameworks

- The Equilibrium Ledger: Macro sociological framework for auditing institutional entropy and the extraction of moral labour from neurodivergent populations.
- The King Solomon Protocol: Governance architecture for multi model AI, establishing a human in the loop arbitration standard to ensure epistemic accountability.
- The Leonardo Paradox: Theoretical model of the containment problem in elite universities, where institutions demand divergent output while excluding the cognitive architecture that produces it.
- The Giulia System, empirical application: Advocacy protocol supporting safety critical bureaucratic navigation for neurodivergent adults.

Selected Research Papers, Theoretical and Scientific

Institutional theory and AI governance

- The Turing Theory and the Law of the Dead Asset: Diagnostic model of sanctified erasure, where institutions valorise high intensity cognition only after neutralisation.
- The Copy and Paste Society: Analysis of institutional entropy and convergence of bureaucratic isomorphism.
- The Temporal Apartheid of Academic Publishing: Critique of the velocity mismatch between generative AI evolution and static peer review timelines.
- The Kinetic Architecture of Return: Empirical validation of the Quantum Boomerang effect in institutional bifurcation.

Psychometrics and cognitive science

- Chronological Compliance versus Cognitive Capacity: Validity analysis of IQ testing as selection for temporal obedience rather than intelligence.
- Temporal Processing Architecture: Critique of construct misspecification in WAIS IV and WISC V instruments for neurodivergent populations.

Epistemology and cultural history

- The Architecture of Thought: Analysis of Raphael's School of Athens as a proto model for epistemic governance and pluralistic equilibrium.
- The Modern Renaissance Witness: A contemporary zibaldone and an authorial charter for posterity.

Interdisciplinary Cultural Diagnostics

- Monograph proposal: The Literary Ledger, From Ontological Weight to Procedural Erasure, 1827 to 1990. Diagnostic archive analysing the transformation of institutional authority in Western literature.
- Research paper: The Visual Ledger, Art History and the Disappearance of the Human Figure. Art historical analysis connecting evacuation of density in European painting to modern bureaucracy.
- Sociolinguistic analysis: Institutional Language as Elite Gatekeeping. Evidence base demonstrating how professional jargon functions as symbolic violence.

Literary and Autoethnographic Manuscripts

- Historical fiction: Voices Against Oblivion, Men and Women Who Shaped Their Destiny, Zenodo, 2026. Narrative companion to The Literary Ledger.
- Autoethnography: I am Not Crazy, I Have Just Got AuDHD, Zenodo, 2025. Empirical baseline for the Somatic Genesis model.
- Speculative philosophy: You Were the Experiment, Zenodo, 2024. Philosophical precursor to the King Solomon Protocol.

Fieldwork and Organisational Sociology, Professional History

- Founder, Giulia Trust and Equilibrium Ledger research programme, 2019 to present. Advocacy and research into bureaucratic failure.
- Executive leadership fieldwork: Thirty year career in senior governance across Damiani, Bvlgari, Gucci, Armani, Ferragamo, and related multinational organisations. Observed and documented institutional entropy and hierarchical dysfunction in high velocity organisational systems.
