

ISMET SAHIN

COMPREHENSIVE
EDITORIAL &
WRITING

About Me

I'm Ismet Şahin – I'm a writer, philosopher and digital publishing entrepreneur, and I'm really interested in exploring the areas where philosophy, science and literature meet. I have a Bachelor's degree in Philosophy from Hacettepe University. My academic journey included looking into the metaphysical aspects of the Big Bang Theory and the philosophy of science. I've built on this foundation and years of creative writing experience to author three books that blend deep intellectual analysis with creative storytelling.

As the founder of Praksis, a digital publishing company that specialises in e-books and books, I'm committed to producing thought-provoking, high-quality content that bridges traditional publishing and modern digital formats. I can help with all aspects of the writing process, from proofreading and copyediting to content writing and fact-checking. I work with both digital and print platforms.

When I'm not working, I love ultra trail running. I find the challenge of long-distance races in rugged, natural landscapes really inspiring. This passion reflects my dedication to endurance, self-discovery and pushing boundaries – values that also come into play in my personal life and my creative endeavours.

Experience

**Praksis Information
Technology and Publishing
Ltd.**

OCTOBER 1996 – PRESENT

Education

**A Bachelor of Arts in Philosophy from
Hacettepe University
SEPTEMBER 1988 – JULY 2014, ANKARA**

I completed my undergraduate studies in Philosophy at Hacettepe University, where I benefited from a high-quality academic program. My thesis focused on the Philosophy of Science, examining the history and philosophy of science with an emphasis on the metaphysical aspects of the Big Bang Theory. During my studies, I took courses in English, including Methodology of Science, Methodology of Economics, Introduction to Economics, and World Economy, as well as courses in French, such as Academic French, EU, and French.

Skill

Comprehensive Editorial and Writing

- **Proofreading**
 - The final stage of the editing process is proofreading. This involves the meticulous correction of all spelling, grammar, punctuation and typographical errors. The proofreading process ensures that the content is polished and professional, free from distracting errors, whether the material is a book, e-book, website or promotional material.
- **Copyediting**
 - Copyediting is a more comprehensive process than proofreading, as it not only deals with superficial errors but also refines sentence structure, improves style, enhances clarity and preserves the original meaning. This type of editing is applied to both digital content (such as landing pages, blog posts and articles) and traditional manuscripts, with the aim of ensuring that the content is engaging, consistent and in line with the author's intended voice.
- **Content Editing**
 - Content editing is a process that aims to improve the overall structure, flow, and coherence of a manuscript. Applied to both print books and long-form digital content (such as e-books and web articles), content editing helps to streamline material, thereby increasing its appeal to readers. In the context of web content, this stage also includes adapting the format for improved online presentation and optimising the user experience.
- **Fact-Checking**
 - Fact-checking is the process of verifying the accuracy of all factual information presented in the content, including statistics, quotes and claims. It is an essential stage in the process of maintaining credibility across all platforms, whether in books, online articles or promotional content. Fact-checking is a process that ensures the reliability of content, thereby building trust with audiences.
- **Rewriting**
 - The act of rewriting involves the revision of selected portions of a text with the objective of enhancing its readability, tone, and clarity. This process is of particular significance when adapting content for different formats, ensuring its suitability for both print and digital audiences. In the context of the internet, the act of rewriting is of particular importance with regard to the creation of content that is both concise and engaging. This helps to retain the attention of the reader and optimise the user experience.
- **Content Writing**
 - The process of content writing involves the creation of original, engaging, and relevant written material for both digital and traditional formats. This encompasses a range of written material, including website copy, blog posts, articles, scientific papers, social media content, product descriptions, and other forms of written material. Content writers conduct research on a given topic, construct persuasive narratives, and optimise content for search engine optimisation (SEO) in order to engage the target audience and enhance web visibility.
- **Book and Paper Writing**
 - The creation of in-depth, long-form content, including academic papers, non-fiction books, and literary works, is known as book and paper writing. This type of writing requires comprehensive research, structured argumentation and a lucid, uniform voice to convey intricate concepts in an engaging manner. In the case of books, this may entail the organisation of chapters, the creation of a coherent narrative and the maintenance of reader engagement through the development of extensive content.
- **Collaboration**

It is imperative that authors, editors, designers and digital teams work together to ensure consistency across both print and digital formats. Editors liaise closely with these teams to guarantee that content is aligned with design elements and that digital materials are optimised for search engine optimisation (SEO) and user experience. This process enables the creation of a unified voice and maintains high-quality standards across all outputs.

Deep Experience with Praksis Publishing Ltd

Hi there! We're Praksis Information Technology and Publishing Ltd. /

I'm the founder and principal author of Praksis Information Technology and Publishing Ltd. I've spent over two decades developing pioneering solutions at the intersection of information technology and publishing, and I love what I do! As a team leader, I've been really proud to play a big part in the company's growth. I've been able to put some pretty cool digital strategies in place and make some big improvements to our publishing processes, so we're ready for whatever the market throws at us!

I'm really interested in both technology and literature, and I've made sure that Praksis is a forward-thinking company. We focus on creative, high-quality digital publishing, and we also integrate the latest IT developments into the publishing ecosystem. During my time at Praksis, we've built a great reputation for excellence in digital content production. I love pushing the boundaries of what's achievable in the industry!

In addition to my role at Praksis, I'm also a published author! I've written three books that explore the fascinating intersection of philosophy, technology and society. My writing is inspired by my technical expertise, and my books aim to encourage reflection on the way we deal with knowledge and innovation. As founder and principal author, I oversee all content creation and strategy, making sure that both our information technology solutions and published works are at the forefront of current trends. This requires a sustained commitment to innovation, a deep understanding of the global publishing market and a practical methodology that encompasses both the technical and creative processes.

Languages

I am a native Turkish speaker.

I also speak English at a professional level.

In addition, I have an intermediate level of proficiency in Russian Кто я? 😊
and French. Bonjour 🙏
