

Curriculum Vitae

I was born in July 19, 1947.

After school I was educated in Karazin Kharkiv State University: Kharkiv, Kharkiv, Ukraine, (September 1965 – February 1971)

After graduating from the university, I worked from 1971-04-01 to 2001-12-31 at the Kiev Institute for Nuclear Research of the National Academy of Science of Ukraine; scientific employer.

Further, from 2002-01-01 to 2010-12-31, I worked at SSC “Technocentre” of Ministry of emergence of Ukraine, Chornobyl-Kyiv.,; scientific employer; from 2011-01-01 to 2013-12-31 worked at Institute of Physics of NAS of Ukraine: Kyiv; retired, now is independent researcher.

Dissertation of “кандидат физ-мат наук” – equivalent PhD - 1993, Institute for Nuclear Research.

In first 2000s I begun to consider foundation of physics problems, what quite naturally required to solve corresponding philosophical ones, first of all of ontologies of Matter, Consciousness, Space, Time, Energy, Information. Our work with Vladimir V. Tokarevsky (Professor in Kiev State University, Department of Nuclear Physics, August 1975 - May 2009), resulted in development of the “The Information as Absolute” conception [<https://doi.org/10.48550/arXiv.1004.3712> a bit edited version is now submitted here], where, first of all, **it is rigorously proven** that there exist nothing else than some informational patterns/systems of the patterns that are elements of the absolutely fundamental and absolutely infinite “Information” Set, the Set exists absolutely objectively, because of it fundamentally – logically - cannot be non-existent and so exists absolutely eternally, having no Beginning and no End.

That clarifies the ontologies of fundamental phenomena/notions above to level when they become to be not metaphysical, but Meta-physical subjects for study; correspondingly that resulted in 2007-now developed Planck scale informational physical model, which is based on the conception, two main papers are in <https://doi.org/10.48550/arXiv.0707.4657> and <https://dx.doi.org/10.20944/preprints202110.0453.v6>, where a number of fundamental physical problems are solved or essentially clarified.

Now I continue developing if the model, which is base of physics development on the way “classical” physics → quantum mechanics → Planck scale physics
