STATEMENT OF RESEARCH INTERESTS

My primary research interests are in the *philosophy of logic*. I am interested in the demarcation problem of logicity. Currently, I am working on the logicity of modal operators with a focus on normal modal logics interpreted in Kripke semantics. In my future work, I hope to explore the logicity of operators in non-normal modal logics (interpreted in more general semantics than Kripke semantics, such as the neighborhood semantics) and see what different notions of structural invariance yield as a result. In this regard, I am particularly curious to explore the potentials of bisimulation invariance.

My secondary interests are in the *philosophy of mathematics* and *metaphysics*, broadly construed. Finally, I enjoy reading and thinking about the issues in the *philosophy of mind* and *phenomenology*, especially about conscious experience.

CONFERENCE PRESENTATIONS

[1] **University of Cambridge, United Kingdom**

Nineteenth Annual Cambridge Graduate Conference on Philosophy of Mathematics and Logic.

Presentation Title: 'What Is A Logical Notion?: Invariance Under Potential Isomorphisms and its Extension to Modal Logic'

24-25 January 2026

[2] **Vilnius University, Lithuania**

3rd International Conference in Logic and Philosophy.

Presentation Title: 'Going Beyond the Logicality Orthodoxy: An Attempt to Extend First-Order Invariance to Modal Bisimulations Using Potential Isomorphisms'

22-23 May 2026

TEACHING EXPERIENCE

Koç University, Istanbul, Turkey

As an Undergraduate Teaching Assistant:

- PHIL 338: Philosophy of Mind
- EQUR 121: Introduction to Symbolic Logic

(*Empirical and Quantitative Reasoning Core Program*)

Spring 2025

Autumn 2021 – Spring 2023

GRANTS AND AWARDS

- Philosophy Memorial Fund Research Prize, University of St Andrews **June 2026**
 - Deans' List Award for Academic Excellence, University of St Andrews **2025 – 2026**
- (*granted each academic year for students with a credit-weighted mean of 16.5 or above [Distinction]*)
