Areas of Specialisation (AoS)

Metaphysics, Philosophy of Physics, Philosophy of Science, History of Analytic Philosophy

Areas of Competence (AoC)

Philosophy of Mind, Ethics, Critical Thinking, Philosophy of Language

Research Interests

My research interests primarily lie in metaphysics, particularly at the intersection of the philosophy of time, physics, and mind, approached from a naturalistic perspective. I am also interested in the implications of metaphysical theories of time for other areas, including moral responsibility within a deterministic reality and the notion of death in light of the view that all moments exist eternally.
